## ***Landcare Catalogue - Winter 2017-18***

The catalogue has prices shown with VAT inclusive at time of going to press. Our website will have changes in stock and prices regularly updated throughout the year.

We will use the website to bring you up to date stock of rootball and specimen plants as they arrive in the nursery. Ask about our horticultural trade accounts.

### ***About Landcare***

Landcare is an independent traditional nursery occupying an 8 acre site growing and caring for plants. We sell to the General Public, Landscapers and Garden Designers. We aim to provide healthy high quality plants, which we source from a number of growers or from our own field and nursery stock.

We supply a wide range of trees and shrubs in containers, root balls or as bare root according to the season. We specialise in quality plants for hedging and trees up to 4m in height.

We have a selection of herbaceous perennials, conifers, climbers and wildflowers.

We are always making additions to our range of container grown plants. If you cannot see the plant you want in this catalogue, please ask as it may be available from our regular suppliers.

### ***Useful Information***

**(H) denotes a plant that is “Harmful if eaten”**

**(E) denotes a plant that is evergreen.**

#### **Guide to tree sizes.**

We stock a large range of trees in 10 litre containers which are approximately 1.5-2.4m in height and readily transported in your car.

Above this height trees are generally sold with a clear stem of 1.8m and classified by their stem circumference (girth) 1m above the ground.

6-8cm girth	Light standard	approx height 2.5m
8-10cm girth	Standard	approx height 2.5-3m
10-12cm girth	Select standard	approx height 3-3.5m
12-14cm girth	Heavy standard	approx height 3.5-4m
14-16cm girth	Extra Heavy standard	approx height 4-5.5m

Some trees are sold as half standards with a clear stem of 1.2-1.5m.

#### **Fruit Trees.**

Fruit trees vary in type and size but their rate of growth and size of the mature tree is determined mainly by their rootstock. We tend to stock both semi-vigorous and semi-dwarf plants with a few dwarf varieties.

Container grown plants in 10 litre are available all year with bare root trees from December to March.

## Rootballed trees and shrubs

These will be listed in our availability list which will available in October. Please check our website for the new season's stock and prices. Better still visit us in the nursery.

Many of the larger evergreen plants are sold as rootballed and are less expensive than similar sized container grown plants. They are field grown, then undercut with their soil and roots, which are then wrapped in biodegradable hessian. **Available mid October to April.**
